

## Mystery of TU B'Shevat Deciphered

### Two towns: New York - Jerusalem

Predicting a date for the destruction of a world city like New York is very risky. It may cause disruption in everyday business as well as create confusion in many quarters. Should we get out of the stock market, sell our real-estate quickly and take a vacation just because someone found a dangerous date in the Torah?

I can almost hear the curses coming from high places of power caused by the political pressures and investment juggling left jumbled in an ugly mess. Despite the social and economic inconveniences, we have come to the short Biblical age of the Last Days – a 7-year Apocalypse to last from 21 December 2008 to 21 December 2015. All of this is described and written out in Revelation 18 where a world port city is destroyed in one hour. Daniel 12:3 foretells that there will be wise ones who understand these matters when the time approaches.

Dating future prophecy is a precarious thing in theological circles. Most do not realize or recognize that dates for a schedule of events in God's Plan for Humanity are embedded within Holy Scripture. This has become possible with the discovery of a "Rosetta Stone" ratio in the book of Daniel. This 7:5 ratio reveals a concealed, double numeric-based system that links Revelation and with Daniel's prophecies on two levels.

The complex mystery language in Revelation reminds me of a child's fairytale where kings and angels are surrounded by dragons. No wonder scientists reject the messages in the Bible and miss out on something wonderful. They are still in a quagmire, blinded by a religion based solely on evolution.

Overlaying those texts with an ancient Hebrew Alphabet Number System (HANS) has explained Bible mysteries that have confused theologians for centuries. The facts suddenly align logically like a railroad schedule and lead to further scientific discoveries. All of this became instrumental in breaking the code of many astronomical calendars and mysterious bronze-gold clocks that date back to before AD. The bronze-gold clocks have been exhibited in museums for hundreds of years while scientists unsuccessfully attempted to decode their puzzling ciphers.

When I discovered that there was an astronomical clock embedded in Genesis that revealed an advance plan for 7,000 years of human history that runs according to exact cycles similar to a railroad schedule, I compared it to Jewish history and their holidays. The correlations I discovered through this method identified past and future events in a clear match to the ancient "clock cycles" just like a railroad has stations that are predictable and conform to a schedule.

In my younger days, I was trained as an instrument-clock maker. Later I became a successful hi-tech

inventor. This combination of training, talent and experience has led me to recognize a design pattern never noticed before by anyone in either theological or scientific circles.

These hidden cycle alignments or occurrences came in sequence like a bracelet that connects one pearl with another. Their ordered succession revealed little bits of information followed by more until it all finally came together in a unifying concept never preached in churches or in the halls of education. So many of these pearls kept appearing that I found I could not keep quiet about them. They became my Babushka books. It is somewhat like if a dam of knowledge stored through the ages had been breached, and I have tried to save some of it with a leaking leather bucket.

It seems that any financial reward for the publication of the Babushka books is rather pointless because I have simply received what God has revealed and mentally journeyed where He has led. Therefore, my books are free and can be found on the Internet in order to educate people in the mysteries of God's Word. The information that I've presented in my books indicate that a remnant will survive the coming Apocalypse and build the new civilization of the future under God's direct instruction. I work to warn the public so that those with ears to hear can make spiritual and material preparations in advance of this coming crisis.

When Noah built his boat, his relatives and neighbors joked. Those who are not prepared will no longer laugh when they perish in the coming modern day calamity. Noah's family survived because they were organized and acted on what God said.

My freely given books will inform you about God's plan for humankind with a schedule of disaster prophesied to happen. They can help you to be prepared if you want to survive. What you do with that information is not my problem. I can only tell you that if you want to inherit what God has planned for us: read and take heed.

Again, my books cost you nothing, and I am hopeful that your belief system is not so established and concrete that it will cause you to ignore their message. I am optimistic that some are still able to think logically and beyond what is taught in our atheistic schools that are designed to keep you in outright ignorance to what God has clearly stated.

### A TU B'Shevat Perspective

The Jewish holidays embedded in the Torah conform to the schedule of God's Plan for Israel and Humanity. That plan matches historical cycles which can project future prophesied dates linked with the destruction of a Beast system revealed in Revelation and Daniel. A sea port city, the global nerve center, will be destroyed over the course of one hour. New York City functions like an octopus, a bestial system with many suction cup tendrils tightly controlling the world's economics and politics

since 1945. That power and influence remains unchallenged into our present, 21<sup>st</sup> century civilization.

In my previous Babushka books, it was proven beyond any doubt that the future dates of the Apocalypse were embedded in the Jewish holiday cycles. The exact dates were only recently discovered with a HANS code overlay.

Let's examine the Jewish holiday TU B'Shevat, which I did not pay attention to at first. TU B'Shevat happens to be the first holiday after a solstice date where moon cycles align with 15<sup>th</sup> of Shevat in the Jewish calendar. They align well with the Apocalypse dates.

**The beginning February 9, 2009 [5769]**  
**The end February 5, 2015 [5775]**

I don't believe it's a coincidence that these dates match a Genesis world calendar when adjusted to our NASA calendar. It also agrees with ancient clocks that overlay a schedule designed from the time of Moses. They define Jewish holidays for Israel that were kept stable and established for thousands of years. For the benefit of my Gentile friends I will copy from the website and comment later what I have found overlaid with HANS. It will be presented from a dual perspective that has deeper meaning than is possible from a single viewpoint.

TU B'Shevat, the 15<sup>th</sup> day of the Jewish month of Shevat, is a holiday also known as the New Year for Trees. The "TU" is not really a word; it is the number 15 in Hebrew (9+6), as if you were to call the Fourth of July "IV July" (IV being 4 in Roman numerals). See the Hebrew Alphabet for more information about using letters as numbers and why the number 15 is written this way.

As I mentioned in reference to Rosh Hashanah, Judaism has several different "new years." This is not as strange a concept as it sounds at first. In America, we have the calendar year (January-December), the school year (September-June), and business has fiscal years. It's basically the same idea with the various Jewish new years.

TU B'Shevat is the New Year set for the purpose of calculating the age of trees for tithing. See Leviticus 19:23-25, which states that fruit from trees may not be eaten during the first three years. The fourth year's fruit is for God. After the fourth year you can eat the fruit. Each tree is considered to have aged one year as of TU B'Shevat. So if you planted a tree on Shevat 14, it begins its second year on the next day. But if you plant a tree two days later, on Shevat 16, it does not reach its second year until the next TU B'Shevat.

TU B'Shevat is not mentioned in the Torah. I have found only one reference to it in the Mishnah The only thing written is that it is the New Year for trees. There is a dispute as to the proper date for the holiday (Beit Shammai said the proper day was the first of Shevat; Beit Hillel said the proper day was the 15th of Shevat. As usual, we follow Beit Hillel." For more on Hillel and Shammai, see **Sages and Scholars**). There are few

customs or observances related to this holiday. One custom is to eat a new fruit on this day. Some people plant trees on this day. A lot of Jewish children collect money for planting and maintaining trees for Israel at this time of year. That's about all that is mentioned.

To have a tree holiday is not unusual as it is referenced in the first pages of the Bible or the Torah. There we have Adam and Eve making a choice between the Tree of Good and Evil or the Tree of Life. When they made the wrong choice they sent the whole human race in another direction. That wrong choice is remembered like recessive genes emerging from ancient cultures many centuries later in the form of cutting down a green tree to be used as a Christmas tree.

It is the story of life suggesting the way of light that Adam should have chosen. If Adam had chosen the correct path for humanity, the dream we have had of heaven on Earth: no pain, no hunger or disease would be in our current reality. Life would be full of abundant joy like a butterfly fluttering around a meadow filled with the sweetness of honey dew. Because of his choice, we now can only experience a shadow of that tree - a tree strung with cheap electric Christmas lights, perhaps.

The tree connection also appears later when Moses hangs a bronze serpent on a tree in the desert to heal the ancient Israelites who angered God with their sin so that he sent poisonous snakes to bite them. In this true story, God introduces a new lesson to help us understand what would happen when Jesus was hung upon a tree to atone for all of humanity's sins thereby avoiding God's anger at us for violating his holiness. The tree reappears again in Daniel's prophecy where it applies to a tree cut down in the King's dream which is interpreted by Daniel. This time it is connected to our time in prophecy. Let's find out how.

**Date of New York's Destruction Linked to TU B'Shevat - 5769 or 5775?**

New York City represents about one third of Israelis who live outside their homeland's borders; therefore, it is a special target for Satan to destroy the woman mentioned in Revelation 12. However, the eternal God made a covenant with Israel to survive the Apocalypse and inherit the Promised Land. Therefore, a warning is in my heart to save those living in New York City, which is prophesied to be destroyed to fulfill Gods promise.

Again, it is a little risky foretelling prophecy, but if you live in New York City with your money invested and now knowing that in addition your life is at stake, I would suggest for you to take a vacation to sunny Florida that first couple weeks of February 2009. If you return home later to an unchanged New York City and feel a bit misled by prophetic interpretations, read my Babushka books again for more instructions.

The dating may have shifted to the next date that but that will not change the railroad plan programmed by God. The birth of the Apocalypse event will happen and,

if anything, only the timing may be off a little. The Bible devotes a full chapter on the destruction of the last city representing the Beast in Revelation and makes it a certainty. The middle of the Revelation chapter got my attention when I read the mention of something for those who live in NYC:

Then I heard another voice from heaven saying, "Come out of her, my people, so that you do not take part in her sins, and so that you do not share in her plagues; for her sins are heaped high as heaven, and God has remembered her iniquities.(Revelation 18:4-6 NRSV)

It would have been nice to be told the date clearly and directly as that would encourage people to read the entire chapter. Having learned so much about ancient clocks and the discovery of a Hebrew code [HANS] it takes a little study to understand this information because so many disagreements exist between theologians that are educated on a monorail or single viewpoint system that is not well balanced. Discovering the many secrets embedded in the Torah pointed me to then to examine all of the Jewish holidays to find the Apocalypse dates. I found out that they conform to God's Plan for Mankind which behaves like the cyclic station of a railroad. Stations are connected with a schedule as they must function as a system.

As one looks closer a timing schedule is revealed which puts everything in logical perspective; however, being surrounded by confused theologians was only a hindrance. Therefore, I was forced to accept the dates only when I found three witnesses or examples in the scripture to classify them as authentic.

Do not believe my opinion but check it out against the scripture which must have three different Bible verses to match Gods approval as it conforms to his plan. We must now narrow the two different projection dates down to one as only one date would match a near-far vision lens overlaid with a HANS system.

Again, if one looks at the near-far vision Bible lens we can learn something from the AD 70 destruction of the Temple in Jerusalem. A year before a Roman general with his seasoned army advanced against Jerusalem. Then for mysterious reasons the army withdrew and then returned a little later. If you are familiar with history, this withdrawal gave the Christian Jews a sign that reminded them of Jesus' prophetic warning to leave town in order to be saved from total death and destruction. Only those who left town got to celebrate Purim later.

This got me started down a road to find the date which overlaid with the HANS discovery predicting the Apocalypse. There were so many witnesses I kept losing count. In the end, however, I am sure God will give us a modern-day warning soon to leave our modern metropolis which is connected with the Beast system.

My search to find a possible date for the nuclear destruction of New York City is discussed later. I began (9-9-08)

wondering why those dates connect with the tree holiday of TU B'Shevat. Jewish holidays follow a pattern of Gods Plan for Humanity, but while tree recognition is fun for kids planting new trees in Israel, I wondered why TU B'Shevat would connect with any type of destruction?

Then one night I decided to check out the tree in Daniel's prophecy to find the answer. It does in fact match up with the Beast system that we will talk about later and is described in my first two Babushka books.

In the beginning of the Torah - in the time of Adam and Eve, we read about the special trees that presented man with a choice of good or evil to live in the Daleth dimension of material time. Later, God, shrouded in mortality, hung on a tree which would give us a choice for Eternal Life in the Jod dimension.

Even the end of the Torah in Revelation mentions trees in Heavenly Jerusalem which have the power of healing nations. This represents the Heh dimension. The Jod dimension is one notch higher [+one] than the other two witness requirements (3 tree episodes for a witness). Trees can be a special time markers for God's plan with the beginning connected to the end of a cycle.

The Bible uses metaphors of near and far vision lenses projecting Bible prophecy. Applying that method to NEW YORK CITY allows us to see if we can find a date that is closer to us now. We have a near vision linked with a tree recorded in Daniel in 588 BC, which will be summed up in a future vision of the Apocalypse in 2008-2015, thus finalizing God's prophetic program. The greatest king in antiquity had a dream of a tree which was followed by 7 years of insanity somewhat like a near vision applies to a distant vision. I suggest that if you have never heard this story that you read the whole chapter for your own clarification.

The tree that you saw, which grew great and strong, so that its top reached to heaven and was visible to the end of the whole earth, whose foliage was beautiful and its fruit abundant, and which provided food for all, under which animals of the field lived, and in whose branches the birds of the air had nests — it is you, O king! You have grown great and strong. Your greatness has increased and reaches to heaven, and your sovereignty to the ends of the earth.

And whereas the king saw a holy watcher coming down from heaven and saying, 'Cut down the tree and destroy it, but leave its stump and roots in the ground, with a band of iron and bronze, in the grass of the field; and let him be bathed with the dew of heaven, and let his lot be with the animals of the field, until seven times pass over him'— this is the interpretation. (Daniel 4:20-24 NRSV)

As we follow the scripture from the near vision and looking in the far vision or future lens we find one portion of the dream Daniel interpreted for the Babylon king that was historically true. The other half, however,

has not happened yet. That particular tree which represents a commercial-military octopus power structure was never cut down. It controls technology exponentially reaching out to global satellites circling the entire planet Earth. You can find more information on this in my first Babushka book – **Apocalypse Prophesied**, which outlines the Plan for Humanity.

Today New York City represents the largest “octopus” in earth’s history. Reaching into every aspect of our civilization, a relatively few powerful corporations with headquarters located in the city control much of the world’s economy and political life. If an Islamic terrorist like bin Laden wants to destroy America for a variety of perceived injustices, it would be logical to choose a city like New York to demonstrate his resolve. How else would someone cause the most damage to the US but by crushing the greatest financial influence around the world? We have already witnessed it twice at the World Trade Center once in 1993 and then again on 9/11.

The Bible describes a world power sea-side city with the greatest global harbor destroyed in only an hour. Technically this would only be possible with a nuclear bomb. This brings me back to the tree story in Daniels vision to find a possible date and link it with a Jewish tree holiday to find its timing. When we put the two together we can hopefully find the third unknown in the equation. The major Apocalypse cycles connected with Jewish holidays are now known but we have not yet examined the other minor holidays.

Those holidays are also embedded with special meanings. One example of this is found in the beginning of the year for trees, the 15<sup>th</sup> of Shevat. It followed by the next Jewish holiday, Purim, which is a festival of victory and joy snatched from certain death when Jews were saved from worldwide destruction in ancient Persia or Iran.

These holiday cycles connect together like the Daleth-Heh system and seem to fit exactly to the day with the Beast system mentioned in Daniel [Daleth] symbolized by a downed tree and connected with the same Beast system found in Revelation [Heh]. Taking a closer look will reveal dating parallels we should consider further.

My dating pretty much follows the sequence of the Jewish holidays starting out with a tree holiday that evolves into the Apocalypse prophecy as is witnessed with the far or near perspective explained in the Holy Scripture. Examine the next coincidence by overlaying Jewish holidays connecting Purim and **Mystery of Tammuz 17**, another Forum Pearl. Finish that with another Jewish holy day, the fast day on the 9<sup>th</sup> of Av. Like two [+one] witnesses, we should pay attention to the witness requirements explained later.

If you follow my advice and get out of town in time, you could celebrate the Purim holiday 30 days later. You should get reacquainted with this holiday if you are a Jew. It overlays a witness date embedded in Genesis 7 that mentions the second month, 17<sup>th</sup> day when the

fountains of the deep broke loose on earth, which really got the Flood waters rising fast!

Noah’s Apocalypse started on December 21, 2288 BC, a solstice. Jesus stated that the next prophesied Apocalypse recorded in Mathew will replicate that of Noah’s by also beginning on a solstice (December 21). Knowing this, I put two and two together, reasoning that hell again will once more break loose 47 days after a solstice day. However, this time it will include a deluge of nuclear fire prophesied in the Bible as well as in the Aztec calendar. Check this out by referring to my third Babushka book, **Asteroid Answers to Ancient Calendar Mysteries**, with pictures of painted Aztec temple walls. Make sure, though, that you use a dual rail perspective.

Calculating forward from the destruction of Revelation 18, the results connect with the far vision prophesy of the biggest tree in Nebuchadnezzar’s third dream. (Daniel 4) That tree was cut down as a fore type of the end of the Beast system. The Beast system is explained further in the earlier dreams, which the Babylonian king experienced.

These probably align with the interpretations of a collapsing New York City overlay. This would cause a regrouping of political power and money in Europe as an alternate world currency controlled by an emerging individual savior-technocrat known as the Antichrist. He will attempt to reassemble a shattered stock market and repair the damaged global trade ruined by arrogant speculators who manipulated and maintained the artificial heights of finance controlling all of the world currencies from America.

The destruction of the world’s global economic center, based on an investment debt system trusted by many, will also terminate the almighty Roman eagle symbols of the American dollar. It will crash like the mighty tree in Daniel’s vision - cut down with only a stump of business roots remaining.

In the six hundredth year of Noah’s life, in the second month, on the seventeenth day of the month, on that day all the fountains of the great deep burst forth. (Genesis 7:11 NRSV)

My projected date is 47 days [one month+17 days] as recorded in Genesis 7, as I have calculated from a solstice date that cannot be messed with in calendar terms. It also hits the target as a Jewish tree holiday. It confirms the dating system of God’s Plan for Humanity to the exact day. If one counts backwards in time, February 9<sup>th</sup> (TU B'Shevat) to January 9, 2009 [one month] plus [17 days] January 8 to December 21, 2008 at midnight matches that date to a day over thousand years of moon cycles converted to a modern NASA calendar.

## **February 9, 2009 - 15 Shevat, 5769 Watch New York!**

The Jewish moon cycle calendar must be calibrated to the Georgian corrected world NASA calendar. Notice that Jewish holidays are shifting more than 30 days by the insertion of "II Adar", an extra month. That shifts many days every 19 years and changes from year to year. The 15th TU B'Shevat falls on a different day every year but only matches a [Genesis:7] Torah day projection in 2009 thereby starting the Apocalypse on February 5, 2015. Why? Since two possibilities still exist, we must further isolate the events of prophecy which must follow the rule of prophesy lenses with the near-far vision perspective. Events with a possible date matching the destruction of New York City needs more information like a mighty tree cut down with only one witness at this moment.

He blotted out every living thing that was on the face of the ground, human beings and animals and creeping things and birds of the air; they were blotted out from the earth. Only Noah was left, and those that were with him in the ark. (Genesis 7:23 NRSV)

The dream Daniel interpreted for the king Nebuchadnezzar specifies that the tree was cut down. Then, 7 years of animal existence for the king occurred like a 7-year Apocalypse. After 7 years, Nebuchadnezzar regained his sanity as well as his title of king, but with a difference. He began honoring God in heaven. Looking at another possibility of matching this tree holiday, I found one date exactly overlaying another ancient date in the Bible - to the same day 4,302 years later.

## **February 5, 2015 - 15 Shevat, 5776 Watch Jerusalem!**

If the Beast system in Revelation is compared to the cut tree in Daniel's dream interpretation, it gives us two dates as well. All trees are cut down in two stages when sawing or chopping with a hatchet. A 30 foot redwood tree would take quite some time to be felled with a hatchet. Eventually the tree would fall but only after a lot of intense work. Nebuchadnezzar's dream of 7 years began and ended with insanity, which symbolized the apocalypse as it was a disaster for the ruling king.

TU B'Shevat 5775 correlates to our NASA calendar date of February 5, 2015. It is very significant as it matches a much deeper interpretation coinciding to an exact day in my world prophetic clock. An asteroid caused massive destruction in ancient times resulting in the end of Noah's Atlantis civilization. It also created a wobble in Earth's rotation which altered ancient calendars.

This event is now dated as February 5, 2287 as reckoned in the planetary sky of the Aztec calendar. That event could match in the far vision Bible lens with the final days of the earthly Beast system in Revelation correlating with the February 5, 2015. If we link it with a (9-9-08)

tree cut down by another asteroid coming as prophesied, to destroy our civilization beginning with 15 Shevat 5775, it results with only a tree stump remaining but banded with iron chains. The capitalistic money system currently controlled by bankers blinded by greed will end on that date. It will never again be allowed to grow and branch out to enslave humankind or to finance various wars around the globe.

According to science magazines, another asteroid is already in an 825 day orbit. Scientists project that it will strike the earth in 2020, although some sources predict that the impact will occur earlier. In order to move that event to an earlier date, I've read other scientists who say that projections of asteroid schedules can change due to one side of the rock being heated differently by the sun, thus altering its course and shortening its scheduled arrival time.

It appears that Bible prophecy is much better calculated when overlaying it with HANS.

A Pearl forum friend has advised me that on the September 18, 2015 date a total moon eclipse will occur. The moon is expected to appear a purple-red color just like Revelation describes. How interesting. I wonder why this is scheduled to happen on the same day?

After 1003 years to the day, a third asteroid strike is predicted in Aztec and Hebrew prophecy that will end the 1,000 years of peace in AD 3018. This will cause the end of a third civilization caused by another rebellion of Satan. This time he is finally executed in "the lake of fire" - probably in what science calls a Black Hole.

There is no doubt to me as a clock-maker, and someone who understands God's calendar, that I would leave of New York City before early February 2009. New York City will be destroyed, of this I am certain. There is no question of it for me. Only a few days early or later can be in question. No one is perfect and I am, like everyone else, a mortal. I feel I need a bit more corroboration. Let's find some.

Using a moon calendar that is not in synchronization with the Earth's orbit around the sun could make a big difference in over 4,300 years it but still has to fall on the day of the announced Apocalypse. It must begin on a solstice day and this date cannot even be debated by godless evolution scientists.

If I had not learned as an scientist that all of the dates match to a day, I would have gotten onto a speculation treadmill just like so many single-minded theologians - those who are frustrated and proclaim a false interpretation of the only Bible verse they can remember "No one knows the time" ignoring the witness requirements of two [+one].

In order to narrow down the trail and get educated in the Torah while at the same time looking for more witness proof, read other Pearls on this web site. Focus on the Apocalypse to go deeper into prophecy from a

360° perspective and learn more about the dated events that will take place between 2008 and 2015. By overlaying the Jewish Holidays with the Hebrew Alphabet Number System [HANS], you will get an additional [+one] witness required in order to accept it as fact. That may convince you that the date to leave New York City is accurate.

Read further and you will find connections with a Purim holiday linking with the Beast system. It evolved in Europe and correlates with the Torah from a 21<sup>st</sup> century perspective matching prophecy. To maintain balance go to the next witness Forum Pearl #102 from a Heh perspective. It will continue concepts from this tree symbolism that connects the Beast system and frames the Apocalypse.

For now, I will stick with just one date, unless enough further research is uncovered to change my mind when overlaying it with HANS:

**February 9, 2009 -TU B'Shevat, 5769**  
**February 5, 2015 - TU B'Shevat 5775**  
**Watch New York!**
